

Emergency Response Consulting, Hazardous Material Cleanup & Storm Water Pollution Control

Action Express, Inc.

Type of Service

- ▲ Summit Staff provides hazardous material emergency response consulting along with Storm Water Pollution Control services for Action Express, Inc.'s 16 terminals throughout the Western United States.

Our staff prepared a hazardous material response program for Action Express which includes a written response plan, spill response charts, and response coordination for first responders ranging from Dallas, Texas to Seattle, Washington. Standard operation procedures were developed for responding to commonly shipped hazardous materials. A damaged goods management strategy was also prepared to promote reuse or recycling of damaged hazardous material containers.

Summit Environmental evaluated all of Action Express's terminals and prepared Storm Water Pollution Control Plans for all appropriate locations. Tasks included determining storm water flow direction, developing site drawings, interviewing Action Express employees, and working with local regulatory agencies

Key Tasks

- ▲ Hazardous Material Preparedness and Release Response Procedures
- ▲ Hazardous Waste Management Program Development
- ▲ Storm Water Pollution Control Plan Preparation
- ▲ Emergency Response Coordination
- ▲ Coordination of Local Environmental Reporting Requirements

Summit Environmental staff provided emergency response services for this truck accident on I-80 west of Boise, ID.
